

BIBLE

STUDY PAK

Bible Research Systems offers a Bible Study Pak that includes everything you need to learn and understand more of the incredible truths of the Bible.

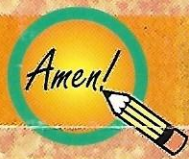

With this powerful, easy to use, software package, insight into the Bible is just a mouse click away.

Verse Search is the cornerstone of an integrated family of Bible study tools. It includes the complete text of the Bible in your choice of translations with a concordance to help you quickly find the verse you need.

Bible Maps show where key events occurred and how nations, cities, rivers, mountains and geographical regions are related. Select any geographic term and click the Map button to display a map with that location automatically marked.

Personal Commentary is like writing your comments in the margin of your Bible. Select any verse and click on the Comments button. Your comments will always be there to remind you of what you discovered in past studies.

Bible Dictionary defines the meaning of unique words. Select a word and click the Dictionary button to read about the historical background and Biblical usage that help you understand the language used in Scripture.

Morning & Evening Devotional is filled with inspiration and instruction for daily spiritual growth.

Bible Timeline displays the sequence of major events and characters.

All of our products are available on CDROM or diskette. The files can be used directly on the CDROM or copied to hard disk.

Features Designed by Users: We have been building Bible study software for 17 years. The features are designed to match the actual study habits of real users from all over the world.

✚ Copy and Paste: Verses can be placed directly into your lesson documents in your choice of formats. The Bible text is automatically linked to your word processor. The Bible Maps, your commentary, word definitions from the Bible Dictionary, and text from the devotional can be copied into your lesson.

✚ Bible Translations: Choose a translation you prefer. Add other Bible translations and display multiple translations side by side and synchronize them for easy comparison.

✚ Concordance: Think of any portion of a verse and the concordance can find it for you, instantly! Select any word and instantly find every verse that contains that word. Search for boolean (AND, OR, EXCLUDE) combinations of multiple words, phrases, sentences, and wild-cards. A search can cover any range of verses in the Bible.

✚ Bible Thesaurus: Synonyms help you find the verses you want even if a slightly different word is used in each verse. This allows you to search on a broad concept, not just identical words.

✚ Color Markers: Mark the Bible text to identify key words, primary phrases or special insights.

✚ Print: All the verses for your study can be printed along with all the study aid materials.

✚ Bookmarks: Mark key verses and jump to them with one keystroke. Never lose your place again.

✚ Daily Reading Schedule: Each day's reading is selected from both the Old and the New Testaments to guide you through the Bible in one year.

✚ Weights & Measures: This chart converts unfamiliar terms to modern English.

Click the Search button to find any word in the Bible.

Copy any set of verses to your word processor.

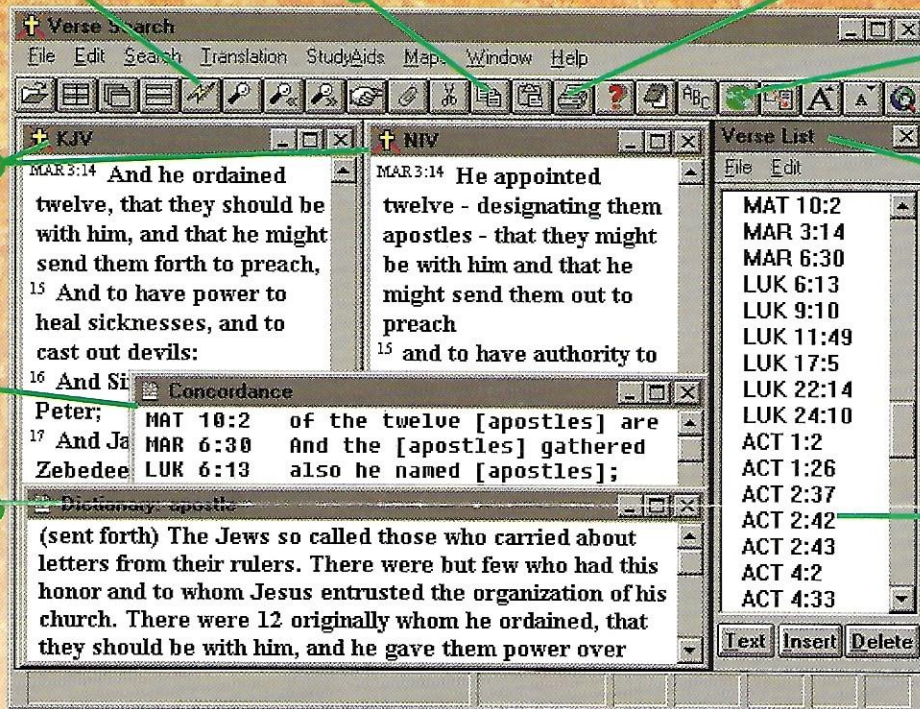

Print any set of verses or any study aid.

Ask for any geographic term to be located on a map.

The Bible text can show any verse in the translation you prefer.

The Concordance shows every verse that meets your search request.

The Dictionary defines words that might be difficult to understand.

"This software has added greater value to the hours I spend in study and teaching preparation. I can now do detailed research in minutes that once took hours!"
