

Tenth Anniversary Celebration!

Ten Years Preparing

Ten years ago, Bible Research Systems was the first to introduce Bible study tools for home computer users. We called our first product, THE WORD processor. Our Bible was the first literature published on electronic media with programs for analyzing the text. Every year we have added new functions and new products. That is why we have sold more Bible study programs to more people than any other company! To celebrate our tenth year of service, we are introducing a radically new Bible study program, version 5.0 with unlimited windows and full mouse support. You might say it's been ten years in the making!

Growing, Growing, Growing

For ten years we have listened as our users describe how they study the Bible. In response to users' requests we have completed a family of products that includes a Thesaurus, Dictionary, Personal Commentary, Chain Reference, Topical Bible, Chronological Bible, Greek and Hebrew transliterators, People and Verse Typist programs. THE WORD processor family of products provides the most comprehensive Bible study tool available on home computers. Your computer can help as you:

Read the Bible:

- display any verse
- page forward & backward
- jump instantly to any verse
- display verses in multiple windows
- compare Bible translations

Build your library:

- create indexes on word usage
- create indexes on subjects
- create indexes on your lesson
- merge indexes to find verses common to both subjects
- merge indexes to combine current and past studies

Study the Bible:

- choose specific range to study
- search for any word
- search for any list of words
- search for any phrase
- search for Boolean combinations
- search for partial word patterns

Increase your study potential:

- study the Bible by several translations
- study the Bible by major subjects, such as love, pride, grace
- study the Bible by major characters, such as David or Elisha
- study the Bible by chronological sequence of events
- study the Bible by following a chain of thought
- study the Bible by recording your thoughts with each verse
- study the Bible by Greek or Hebrew word usage

Prepare your lessons:

- write lesson text
- include any verses
- choose your own print format
- print any range of verses
- print any list of verses
- print all verses for your lesson

VERSE SEARCH version 5.0

(includes a Thesaurus and INSTANT ACCESS)

VERSE SEARCH is the cornerstone product in THE WORD processor family. It includes the entire text of the Bible in one translation of your choice. Browse through the scriptures as you choose, paging forward or backward or jumping to any verse whenever you choose.

Directly access any verse in the Bible, instantly!

You may not know where to find Malachi in the Bible, but VERSE SEARCH does. Ask for any verse in the Bible and that verse will be instantly displayed. Display multiple windows with different text in each window for comparing verses.

Search the Bible for any word, instantly!

Searching the Bible is a breeze. Think of any portion of a verse and VERSE SEARCH can find it for you. And it's fast! INSTANT ACCESS is a special utility that comes free with every purchase of VERSE SEARCH. This utility has already searched for every word in the Bible. That means VERSE SEARCH knows exactly where to look. Any word anywhere in the Bible can be found instantly with no delays for searching the text. When you enter the word you want to find, VERSE SEARCH will display the verse containing your search criteria. For more complex searches, combine any set of words, partial words or phrases.

Use a Thesaurus to search on a concept.

Sometimes a word search is not enough. If you search on the word "obey" you will miss the verses on "keep my commandments" and the verses on "follow me". But if you ask for the synonyms of "obey", you will find: follow, mind, observe, keep, consent, submit, yield, perform, agree. VERSE SEARCH uses synonyms to find the verses that you want even if a slightly different word is used in each verse. That allows you to find verses that reference a broad concept, not just identical words.

Print any portion of the Bible in the format you choose.

VERSE SEARCH allows you to print any portion of the Bible text with options to set margins, line spacing, line count and page size. Print all verses common to one topic or any of your personal studies or all verses that contain a specified word or any list of verses you want. Choose your own print formats. All popular printers are supported.

Copy Bible text to your own files.

Many people like to include portions of Bible text with their own writings. VERSE SEARCH copies any portion of the Bible text to a standard ASCII format file. If you use a generalized word processor that can read a standard ASCII file, the text of the Bible can be integrated into your own lesson documents.

Multiple Windows

Multiple windowing capabilities are provided with all products in THE WORD processor family. Separate windows can be used to compare verses from different parts of the Bible or from different Bible translations. Change the size of each window and move each window to display many portions of the Bible side by side. Even multiple translations can be viewed together.

Standard User Interface

Pull-down menus and full mouse support are standard. And it's simple! To tell THE WORD processor to do something, just choose from a list of possible commands displayed as a menu.

HELP when you need it.

A built-in HELP function is always aware of what you have done and what you can do next. It explains each command in direct, non-technical terms. The manual has a chapter that provides a "hands on" exercise to acquaint you with the main features of the product and contains complete, clear explanations of each product capability. Technical knowledge of computers is not required.

Integrating Add-on Products

Many people find that VERSE SEARCH meets all their needs for a quick concordance access to the Bible. But before you buy a Bible search product, consider what your next Bible study needs may be. VERSE SEARCH is only the beginning of many possible tools to aid in your study of the Bible. As you become familiar with the ease of use and flexible capabilities of VERSE SEARCH you may choose from several add-on products. Each of the additional products requires VERSE SEARCH and expands upon its capabilities. All the products integrate together to make the most complete Family of Products for Bible study that can grow with you as your Bible study grows.

Use LIBRARIAN to Build a Library of your Personal Studies

VERSE SEARCH is designed to help you study the Bible. LIBRARIAN is designed to record your studies both for building your own library and for sharing your lessons with others. LIBRARIAN displays an edit window that allows you to enter the text of your lesson. Verses can be copied directly from the Bible text into your lesson text. Save your lesson text, refer back to previous lesson text and search your lesson text. For subjects of more lasting interest you may create permanent indexes to the Bible text. Once created, these indexes allow you to gain immediate access to verses in the Bible that pertain to a specific subject. Create as many indexes as you wish. Bible Research Systems offers a starting library of topical indexes called TOPICS. You can expand upon this library with your own studies or you can build new ones. Indexes can also be merged to combine your current studies with previous studies. Thus if you had an index on the subject "God's grace" and you were currently studying on the subject "God's justice" you could merge these indexes and find those verses that deal with both subjects.

Features of VERSE SEARCH:

- choose one translation you prefer:
KJV, NIV, NKJV, RSV
- add other translations at any time
- show four translations side by side
- unlimited number of sizable windows
- browse through Bible text at your leisure
- verses can be viewed in context
- INSTANT ACCESS utility
- jump to any verse instantly
- show list of every word in Bible
- search for any word instantly
- search for combinations of words
- search for any phrases or partial words
- search on concepts using a Thesaurus
- print any portion of Bible text
- choose your own print formats
- copy any Bible text to your own files
- menu driven
- full mouse support
- unlimited windows
- on-line HELP available at all times
- support for many Add-on Products
- free Technical Support

Features of LIBRARIAN:

- edit your own lesson text
- copy Bible text into your lesson text
- save lesson text in a personal library
- refer back to previous lesson texts
- build permanent indexes to the Bible
- save the results of important searches
- merge current and previous studies

Other Add-on Study Aids:

- Memory Resident VERSE TYPIST
- Additional translations:
KJV, NIV, NKJV, RSV
- Chain Reference Bible
- Greek transliterator
- Hebrew transliterator
- Chronological Bible
- Personal Commentary
- Bible Dictionary
- LIBRARIAN
- TOPICS
- PEOPLE

CUSTOMER COMMENTS:

A number of our customers and dealers have gone out of their way to voice their comments about our product line. A few of them are shown below:

THE WORD processor is the finest software for general Bible research we have found. Its ease of use and great speed and capabilities commend it to the novice as well as to the seasoned researcher. THE WORD processor has our strongest recommendation.

E.W. Goodrick and John R. Kohlenberger III
Co-editors of *The NIV Complete* and *Handy Concordances*.

The Bible Research Systems products have become an integral part of my research and sermon preparation. They are a natural extension to my studies. It would be difficult to get along without them now that I have been spoiled with their capabilities.

Dan Davis of Hope Chapel, Austin, Tx.

I'm having a wonderful time with the programs. As a student and minister they cut down on a lot of leg work. It's an overall great program.

Frank Mc Ghee of Trotwood, Oh.

I use it every time I study the Bible. It is a very practical application to develop my sermons based upon the Greek and Hebrew languages. I wish that I had owned it 10 years ago.

Rev. Gwin Turner of Los Angeles, Ca.

This is the finest Bible study program on computers available. Many of our missionaries buy it as soon as they have seen it in operation.

Missionary to Africa

THE WORD processor is easy to learn and does incredibly fast searches. It enhances my study abilities and clearly demonstrates the benefits of computers in ministry. I sincerely recommend this program to anyone with the desire to grow in their Bible study.

Floyd Jones, Houston, Tx

This software has added greater value to the hours I spend in study and teaching preparation. I can now do detailed research in minutes that once took hours. THE WORD processor is an all encompassing family of programs that has my strongest recommendation.

Paul Raybern, Houston, Tx

As a computer consultant, I study all the Bible programs in order to advise my clients. Nothing holds a candle to the family of products offered by Bible Research Systems.

David Skinner, Tampa Bay, Fl

I have used THE WORD processor for many years and have long grown accustomed to the benefits it offers in my personal studies. Now version 5 has added so much more. It was easy for me to learn. And I have added new study aids over the years as my Bible study needs have grown.
