

Version 5.1 Update

Something New!

One year ago, Bible Research Systems introduced a new Version 5.0 of our family of products for Bible study. This new program included:

- o new windows that are:
 - . overlapping
 - . moveable
 - . sizeable
 - . unlimited in number
- o full mouse support
- o pull-down menus
- o context sensitive Help
- o instant indexing
- o proximity searching
- o BookMarks
- o many changes recommended by our users

User Reaction

The response was overwhelming! For months our phone lines were flooded with user inquiries and orders. Never before have we experienced such a demand for new software. Our staff and resources were stretched to respond to every request. We express our thanks to all of you who waited patiently for service and shipments.

Version 5.0 also required each user to learn a new interface. Pull-down menus and mouse support were new to many people. But the learning process has proven to be worth it. Users have responded positively to the benefits of speed and ease of use of the new programs.

What Next? Version 5.1

During this year of introducing the new Version 5.0 programs, we have received hundreds of suggestions from users for additions and improvements that would help in their personal Bible study. Our technical staff has incorporated many of these changes and have added several new products. Version 5.1 features are described in this brochure and are now available.

1981 - 1991 Tenth Anniversary Celebration

VERSE SEARCH version 5.1 for IBM

New Features

Tutorial Disk

Version 5.1 includes a new Tutorial disk. This disk explains and demonstrates how to use each of the features of VERSE SEARCH and the family of products. The instructions are illustrated with actual examples of each menu and command. The Tutorial disk is included FREE with each copy of Version 5.1.

Multiple BookMarks

Version 5.1 now offers 10 separate BookMarks. These BookMarks are associated with the number keys 0 through 9. To set a BookMark, hold down on the Ctrl key and press the number key. For example, display John 3:16 and press the Ctrl+5 keys. This verse is now BookMarked. Anytime you want to return to this verse, just press the 5 key. A new command, **Show BookMarks**, displays a list of the ten BookMarks and shows the verse assigned to each BookMark. Select any verse in the list to be displayed next.

Quick Reference Guides

The Help menu now includes a new command to display a summary guide to the shortcut keys. The guides are context sensitive so only the keys currently available will be shown. This quick reference list avoids browsing through the menus searching for the command you want. If you forget what key to use, the Quick Reference Guide will remind you.

Quick Print Single Verse

The Ctrl+P key now prints a single verse. This is a quick way to print a verse without using the menu commands and dialogs.

More Shortcut Keys

Many new shortcut keys have been added to the menu commands. For users who prefer to use the keyboard, this provides many additional functions with fewer keystrokes than using the menu commands.

Synthesizer Support

If your computer has a voice synthesizer installed, this option can be set on the Systems Settings dialog. Only one verse will be displayed in each scripture window. This gives the synthesizer more control over positioning and voicing the text.

Save Start Configuration

You may specify the windows you want to be opened automatically at the beginning of each new session. The Systems Settings dialog now includes a button called Startup. The size, location and translation will be saved for each scripture window (up to 4) and the Verse List window and the Lesson Editor window. When you begin each future session, the same windows will be opened automatically.

Memory Enhancements

Version 5.1 has many changes that improve memory management. The amount of memory required depends upon the type and number of windows that are open at the same time. We recommend that users of DOS 4 who have extended or expanded memory installed should upgrade to DOS 5 for better memory management.

DOS Shell

The DOS Shell command temporarily returns to DOS. Just type the the word EXIT to return to VERSE SEARCH.

Modifications

Changes have been made to other products in the family as suggested by users. For example, the Chain Reference dialog now includes buttons for displaying the next or prior verses from the Verse List, the Word Origin analysis now includes every word form in the search criteria, and the Chronological Bible now displays in an edit window. Please keep sending your suggestions!

New Product: BIBLE OUTLINES

A new product is now available called Bible Outlines. It includes a detailed outline of every book in the Old and New Testaments. When you are studying a particular book, just choose the Bible Outline command from the StudyAids menu. An outline of the book will be displayed. The outline can help to identify the primary thoughts and the supporting arguments in many Bible passages. The outlines can be modified. You may want to change each of the outlines to reflect your own conclusions drawn from your studies.

KJV	
1Co 1:10 Now I beseech you, brethren, by the name of our Lord Jesus Christ, that ye all speak the same thing, and that there be no divisions among you; but that ye be perfectly joined together in the same mind and in the same judgment.	
Outline of 1 Corinthians	
A. Salutation	1Co 1:1-9
B. The Problem of Factions	
1. Divisions in the Church	1Co 1:10-17
2. Wisdom of God	
a. Christ the Power and Wisdom of God	1Co 1:18-31
b. Proclaiming Christ Crucified	1Co 2:1-5
c. The True Wisdom of God	1Co 3:1-23
3. Measure of Judgment	
a. The Ministry of the Apostles	1Co 4:1-13
b. Fatherly Admonition	1Co 4:14-21
C. Moral Standards	

New Product: New Revised Standard (NRS)

This modern translation has been added to our list of English language Bibles. It includes the Apocrypha books. Other translations including the RSV may be displayed side by side for comparisons. The add-on products also available to work with this translation include: Verse Typist, Librarian, Topics, People, Bible Dictionary, Bible Outlines, Chronological Bible, Personal Commentary and Chain Reference. (The chain references are tied to the verse but not to specific words within the verse.)

New Product: Reina Valera Actualizada (RVA)

This Spanish translation (copyright 1989 by Casa Bautista) is now available. All menus and Help messages remain in English. Only the Bible text is in Spanish. The add-on products also available to work with this translation include: Verse Typist, Librarian, Topics, People, Personal Commentary and Chain Reference. (The chain references are tied to the verse but not to specific words within the verse.)

New Product: CD\ROM Storage Option

A CD\ROM disk is now available containing all the files used by any of the Bible Research Systems family of products. You may choose to use your hard disk for files you create for yourself or for maximum disk speed and to use your CD\ROM drive for storing the static Bible text and related files. The functions remain the same, only the storage media has changed. This option may help users who own a CD\ROM drive and are limited by the hard disk space available.

Update Price

The price to update from version 5.0 to 5.1 is \$35. This covers the update for all products whether you have only Verse Search or the entire family of products. Whatever products you have purchased will be automatically updated. See the enclosed order form for details.
